Import all information from a file – Done

Document the database with UML – Done

Application / Code design – Up to you, our opinion is -Done

We have done all the requirements and we have also added extra features to our project. This is why we think we deserve an A.

Here are the features we have added:

We have added the statistic from alternative 2, and the statistic is always shown on the home page.

We decided to use ORM instead of normal sql to avoid sql injections.

We used mvc pattern when structuring our code
